# AI-Based Data Science for Forecasting and Planning

## Overcoming the Unique Production Challenges of the Pork Industry From Farm to Fork

The global pork industry is forecast to grow by over 1.6%, an increase of over \$22 billion, between 2022 and 2026<sup>1</sup>; this creates an opportunity for pork producers and processors. To take advantage of this growth, pork packers and producers need to make significant changes to their tech stack to be able to answer the following questions:

- How do I accurately forecast supply and demand?
- How do I reduce distressed sales?
- How do I increase profitability on a per-head basis?
- How do I optimize production efficiency through scheduling?
- How do I forecast how much product will be left to sell more accurately?

### HOW WE CAN HELP

To help the pork industry thrive no matter what comes next, we've developed a centralized view of your entire supply chain that vastly improves forecasting and planning.

Ever.Ag's AI-based data science platform gives you the information you need to create a detailed and dependable plan for meeting your production goals. The platform even easily integrates with a variety of systems, including ERPs, and leading point solutions across the supply chain to connect your data.

**Increase revenue up to 3.5%, potentially saving millions of dollars**

**Increase margins 1-3% per quarter**

**Create a single source of truth across teams**

## AI-Based Data Science for Forecasting and Planning

Throughout your entire supply chain, this platform can help you forecast any time horizon that suits your specific business needs on a daily or weekly level, enabling you to plan and make decisions with industry-leading depth and detail. You'll even be able to finally align the production of all your products with your sales team's orders, any applicable promotions, seasonality, and more.

The platform can help you forecast any time horizon, from daily to weekly, based on your specific business needs. Now, you will be able to plan and make decisions throughout your supply chain with industry-leading depth and detail; ultimately, it will help you optimize your production schedule and successfully fulfill future demands. You'll even be able to keep your sales team informed on what they have left to sell for any time horizon.

### SOLUTION MODULES

The modules of your platform can be configured to meet your unique needs, including:

- Supply Planning
- Demand Planning
- Production Scheduling
- Product Availability
- Inventory Analyzer
- And more!

**“The platform was delivered quickly, with minimal impact to our team during implementation. We are extremely happy with the tools, and their impact on our bottom line is substantial.”**

**- JOE VILLARI  
CEO, VILLARI FOODS**
